

# 2013 SUMMARY REPORT

## Commercial Feed Inspections

PLANT INDUSTRIES DIVISION  
BUREAU OF FEED, SEED, AND TREATED TIMBER

# **Missouri Department of Agriculture**

## **Mission Statement**

---

To serve, promote, and protect the agricultural producers, processors, and consumers of Missouri's food, fuel, and fiber products.

## **Bureau of Feed, Seed and Treated Timber 2013 Program Review**

The Missouri Department of Agriculture, Plant Industries Division, Bureau of Feed, Seed and Treated Timber assists the state's feed industry and consumers through inspection, product testing and providing information to consumers to assist in making buying decisions. The Summary Report of 2013 Commercial Feed Inspections includes data from more than 1,800 inspections and over 56,000 laboratory tests. This report is provided as a reference and annual review of the Bureau's responsibilities and accomplishments.

The emphasis on food safety has increased in recent years and with has come increased recognition that livestock feed is a key component in food safety. The Missouri Department of Agriculture, Bureau of Feed, Seed and Treated Timber, in cooperation with FDA, plays an important role in food safety through its role in providing inspection and surveillance for Bovine Spongiform Encephalopathy (BSE) Prevention and Good Manufacturing Practices (GMP) inspections. Bureau inspectors are trained extensively and hold FDA credentials to carry out surveillance inspections. These inspections ensure animal feed is safe and help protect the safety of the food supply for human consumption.

The Bureau performed 250 BSE inspections in 2013. These inspections of Missouri feed facilities reviewed the practices of manufacturers and/or distributors of feed products containing prohibited mammalian protein in compliance with Federal Rule 21 CFR Part 589. These inspections are designed to assure that no prohibited protein is fed to ruminant animals.

Fifteen GMP inspections of federally licensed medicated feed manufacturing establishments were performed by Missouri Department of Agriculture (MDA) staff in 2013. An additional 15 inspections were conducted at medicated feed production plants not licensed by FDA. Those inspections are a vital part of the food safety initiative for all animal feed. The program is intended to ensure legally approved levels and combinations of drugs and antibiotics are used in feed products and that each facility's housekeeping, records, labeling, cleanliness and other practices are in order.

The Bureau of Feed, Seed and Treated Timber conducted an annual survey of corn produced in the state. As in past years, corn was tested for crude protein and aflatoxin levels. Laboratory tests were also performed to determine levels of fumonison, vomitoxin and zearalenone in the corn survey. Notifications were sent immediately to facilities where corn was sampled containing toxin levels exceeding FDA guidelines for safe use for livestock.

The Bureau of Feed, Seed and Treated Timber also cooperated with the Plant Pest Program and the USDA to obtain samples from Missouri's 2013 wheat production. All samples collected tested negative for karnal bunt wheat disease. The assurance provided by this testing allows Missouri wheat to be exported to many countries that require the testing.

The Bureau of Feed, Seed and Treated Timber inspectors responded swiftly to 18 complaints in 2013 about the quality or safety of feed or feed ingredients. When problems required testing beyond the scope of the feed program or the capabilities of the Missouri Feed Control Laboratory, other agencies were utilized or samples were sent to other laboratories for testing.

The Bureau of Feed, Seed and Treated Timber took regulatory action against unlicensed companies or those who failed to file tonnage reports. Those actions are reported in "Violations Other Than Failure to Meet Label Claims."

The Missouri Feed Control Laboratory reported results on 4,928 official samples in 2013. Inspectors routinely collect samples of finished feeds and feed ingredients. Those samples are tested for adherence to label guarantees. If testing reveals a deficiency or excess from the guaranteed analysis or something of a detrimental nature is found, a Withdrawal from Distribution Order is issued immediately. There were 582 withdrawals issued in 2013, for a statewide compliance rate of 88.19 percent.

A total of 458 service and complaint samples were analyzed in 2013. The total number of samples analyzed by the Missouri Feed Control Laboratory was 5,421, resulting in 56,948 individual assays in 2013.

The Missouri Feed Control Laboratory analyzed 19 customer-formula samples in 2013. Customer-formula feeds are those for which the customer has designed his own ration and asks for specific ingredients in specific quantities to be blended by the manufacturer. The customer requesting the feed and the manufacturer of the feed each received an analytical report showing nutrient levels found in the sample. In addition, customers received a questionnaire to confirm the quality of feed requested was received.

The Excellence in Compliance Award Program was continued in 2013. Companies are honored who have achieved at least 95 percent adherence to label guarantees on five or more samples. The companies must also have all fees and reporting up to date. Seventy companies qualified for that award in 2013. Thirty-nine of the companies receiving the award are here in Missouri.

The Missouri Department of Agriculture's goal has been, and will continue to be, to serve, promote, and protect our agricultural producers, processors and consumers of Missouri's food, fuel and fiber products.

## **U.S. Food and Drug Administration Guidelines for Aflatoxin Levels**

Corn containing less than 20 parts per billion aflatoxin is considered safe by the U.S. Food and Drug Administration for use in all animal feed. Corn exceeding 20 ppb can be fed only for specific age, weight, and production stage. Corn exceeding 300 ppb must be blended with corn containing little or no aflatoxin before feeding is allowed to specific age, weight, and production stage of livestock. Before corn can be blended for out-of-state shipment, the U.S. Food and Drug Administration must be notified and permission obtained from the Missouri Department of Agriculture for this to be allowed.

U.S. Food and Drug Administration guidelines are as follows:

Aflatoxin Level (in parts per billion)	Commodities & Species
20 ppb	For corn, peanut products, cottonseed meal and other animal feeds and feed ingredients intended for dairy animals; for animal species or uses not specified below, or when the intended use is not known.
20 ppb	For corn, peanut products and other animal feeds and feed ingredients, but excluding cottonseed meal, intended for immature animals.
100 ppb	For corn and peanut products intended for breeding beef cattle, breeding swine or mature poultry (e.g. laying hens).
200 ppb	For corn and peanut products intended for finishing swine (100 pounds or more).
300 ppb	For cottonseed meal intended for beef cattle, swine or poultry (regardless of age or breeding status).
300 ppb	For corn and peanut products intended for finishing beef cattle (i.e., feedlot cattle).

## **2013 Corn Survey**

The Missouri Department of Agriculture is happy again to report the results on our annual monitoring of aflatoxin in corn. This survey has been reported yearly since 1993. We also analyze all customer complaint samples for aflatoxin when symptoms suggest adulteration. Laboratory tests are conducted to determine the average crude protein in corn. In 2013, the average crude protein for corn was 7.65%, down from 9.12% in the 2012 crop. Each sample was adjusted to a 13.5% moisture level.

Samples of corn are drawn from counties having an expected production of greater than 1.5 million bushels, with one sample added for each additional two million bushels produced. Aflatoxin was found in 9 of the 139 samples tested. The values reported were in a range from 17-109 ppb. Each time aflatoxin was found, the facility where the sample was taken was notified immediately and FDA guidelines for safe use or proper disposal were supplied.

The Missouri Department of Agriculture is committed to food safety and quality for the protection of our state's consumers. Our mission is to continue to serve, promote, and protect the agriculture producers, processors and consumers of Missouri food, fuel and fiber products.

### **Crude Protein Summary Last Ten Years**

	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013
Corn	7.53	8.30	8.38	7.62	7.35	7.23	7.65	8.20	9.12	7.65

### **Aflatoxin 2013 Corn**

Findings	1	4	2	2	0	0

## 2013 STATISTICAL SUMMARY

Total Number of:

Commercial feed licenses issued	1,789
Small package pet and specialty pet food products	8,586
Unpaid products over the maximum fee per labeler	109
Formula feed sold (tons)	1,355,652
Feed ingredients sold (tons)	4,774,234
Feed inspections by inspectors*	1,892
Official labeled samples	4,298
Guaranteed claims tested and reported	25,316
Non-guaranteed claims tested and reported	6,618
Withdrawal from distribution orders issued	582
Custom mix samples	19
Nutrients tested and reported	125
Service samples	458
<u>Nutrients tested and reported</u>	<u>1,542</u>
TOTAL SAMPLES TESTED	5,421
TOTAL VALUES REPORTED	34,483
TOTAL TESTS PERFORMED	56,948

\*A feed inspection is defined as one inspection for each facility visited where a “notice of inspection” is written indicating the type of regulatory action taken.

## **Excellence in Compliance Award**

The Excellence in Compliance Award is designed to recognize those companies who have high standards and have met or exceeded a 95 percent rounded average compliance in 2013. Those companies are listed below.

The Missouri Department of Agriculture will issue a certificate to honor those companies that have met or exceeded the following criteria:

- At least five random official regulatory samples must have been taken by a Missouri Feed and Seed inspector and been analyzed by the State Feed Control Laboratory in 2013.
- A 95 percent passing compliance rate on five or more samples must have been achieved for the 2013 calendar year.
- The company labeling the feed or feed ingredient must be in good standing with the Bureau of Feed and Seed retain a Missouri Commercial Feed License and have all quarterly inspection fees or yearly product listing (pet and specialty pet foods) paid as required.

A total of 70 feed labelers have achieved a 95 percent or better compliance rate in Missouri in 2013.

Thirty-nine of these companies maintain an address in the state of Missouri and 31 are located outside of Missouri. A number of companies with out-of-state addresses have manufacturing facilities in Missouri.

## **SECTION 1**

Section One is intended to show the reliability of labelers in meeting their claims for feed quality. Inspections were planned on a random basis. The greater the number of samples taken per labeler, the greater the probability that the consistency in meeting claims shown will represent how well the labeler met guarantees.
